

LOGIN TO THE WORDPRESS DASHBOARD

To access the dashboard for WordPress in log-in area for your administration, going to your website address + */wp-admin* is the easiest way to get into it.

Step1: WordPress admin login page

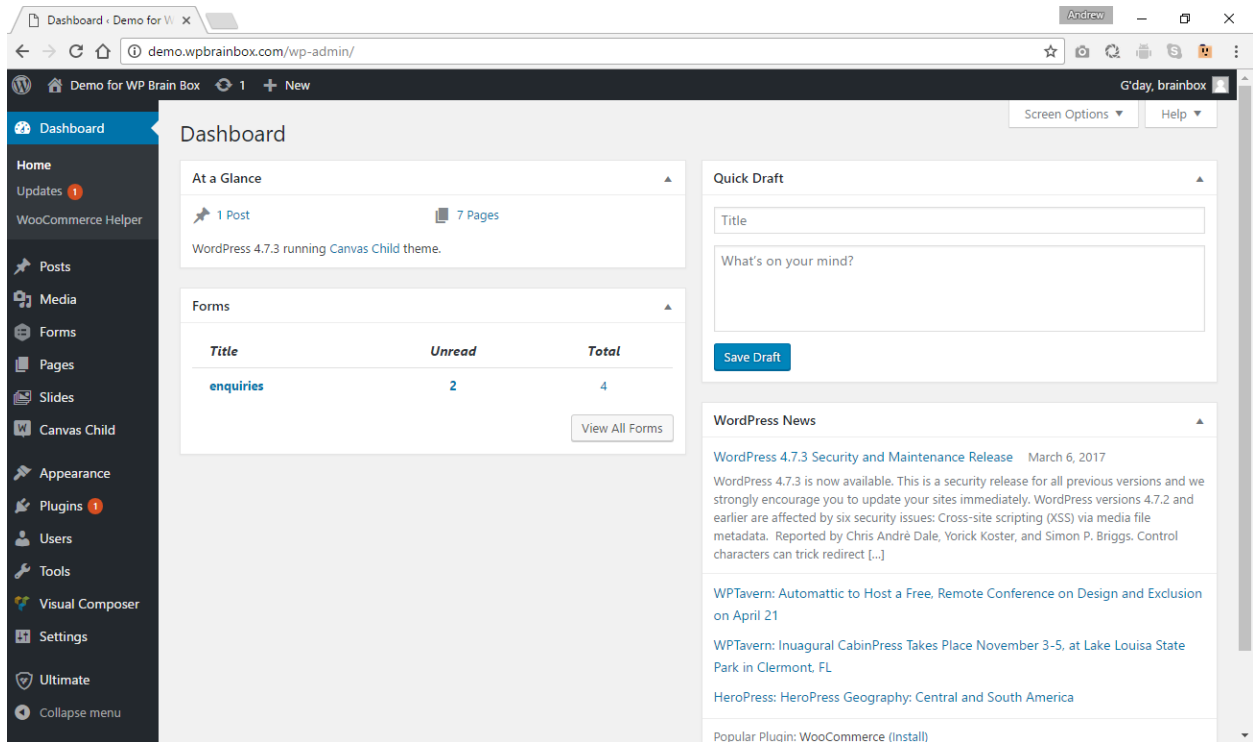

Go to the URL box and type the complete address of your website plus the */wp-admin*. It will redirect to your website log in page.

For example: www.mybusiness.com you need to concatenate with */wp-admin* to your complete address to make it www.mybusiness.com/wp-admin.

Once you get to the login page, you need to provide your user authentication to be able to access your WordPress dashboard. You might also like to tick **Remember Me** for your browser to remember you once you get back to the site. If you tick Remember Me, you will be automatically logged in once you access the site or the login page.

Remember. Only tick **Remember Me** when you are using a personal computer or any computer that you trusted to use.

Step 2: WordPress dashboard

After logging in, you are now presented with your WordPress dashboard.
