

OPEN A PAGE FOR EDITING

Step 1: Login as administrator then click edit page from the top

If you're on the page we want to edit and you're logged in as administrator, you can just click **Edit Page**.

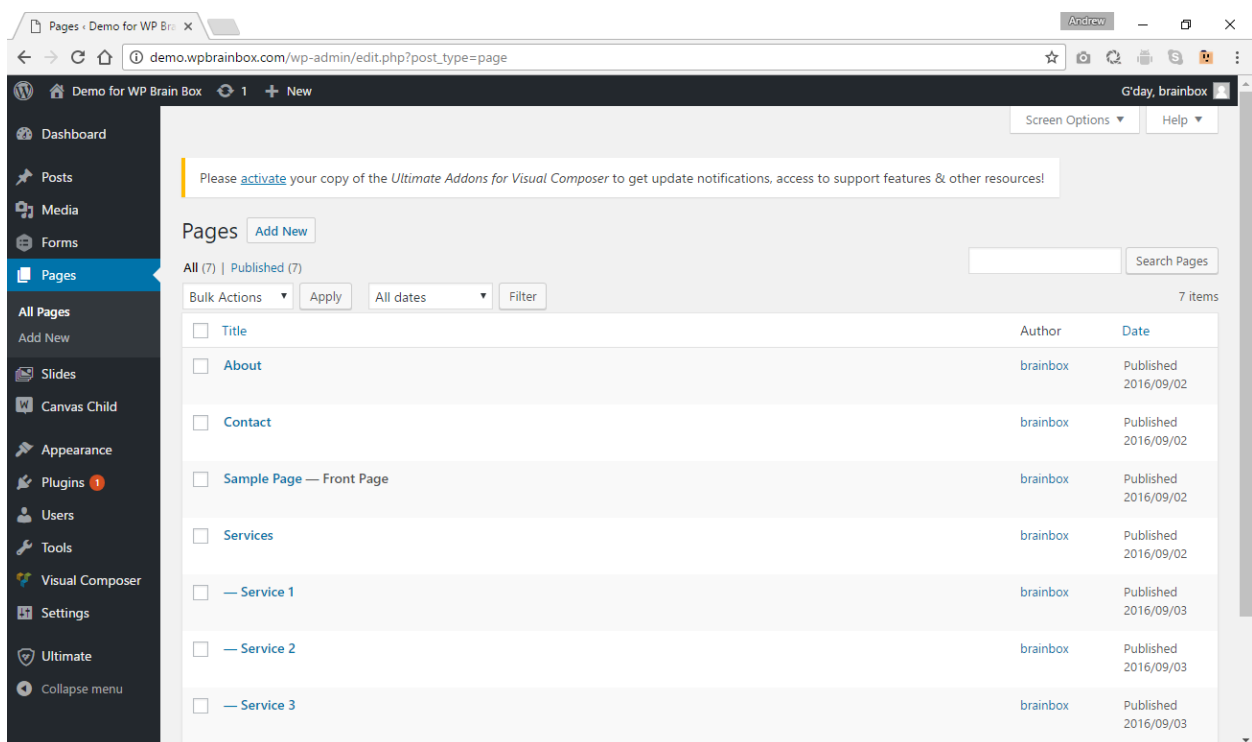

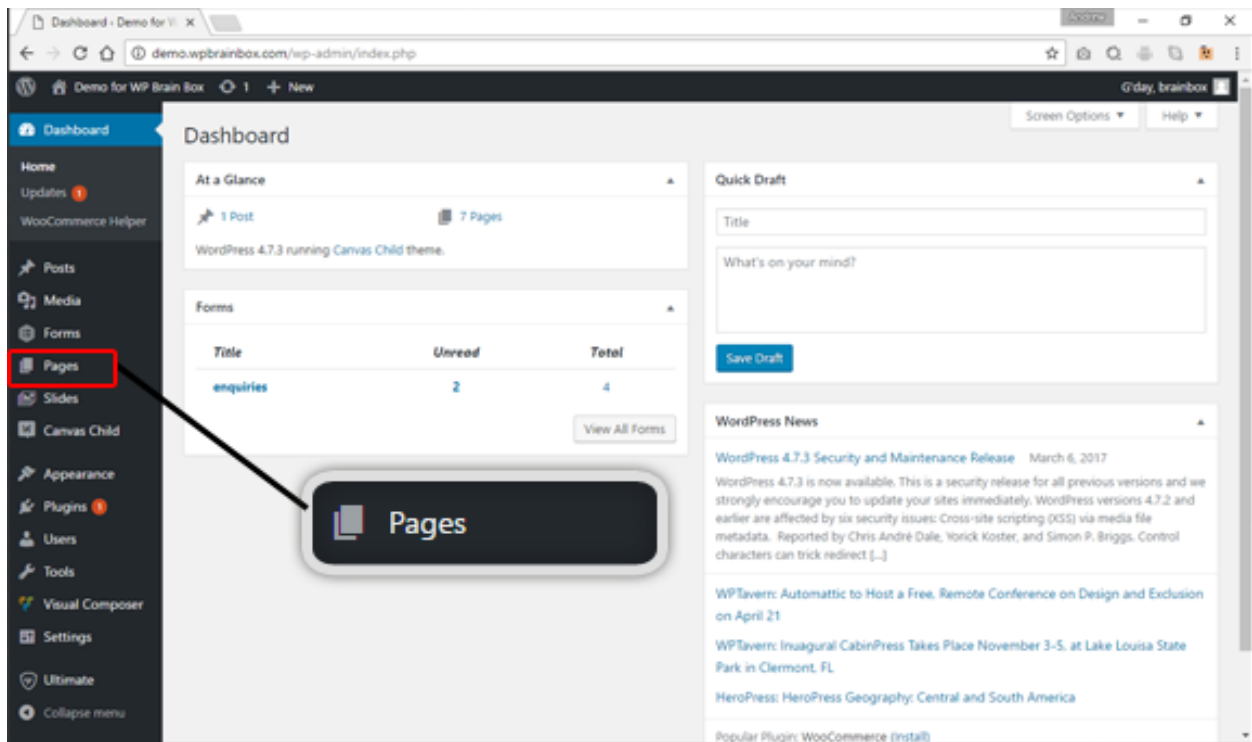

Step 2: You will now be on the backend editor view of the page

After clicking the **Edit page**, it will take you to the back-end view. In the image above, you can now see the page editing area.

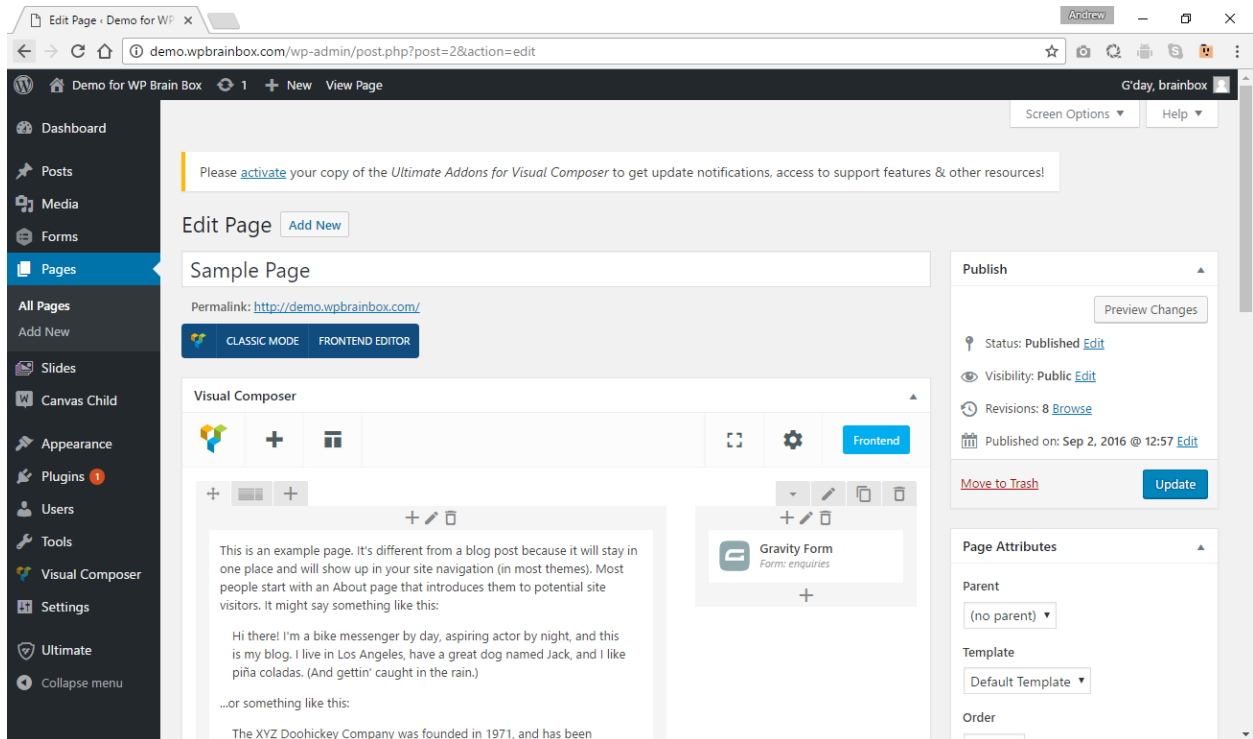

OR

Step 1: From WordPress dashboard

If you are already in the back-end view of your website, just click **Pages** and it will show you the list of pages we've created. To edit the page we want, click on the title of the specific page or you can also click the **Edit** link below title.

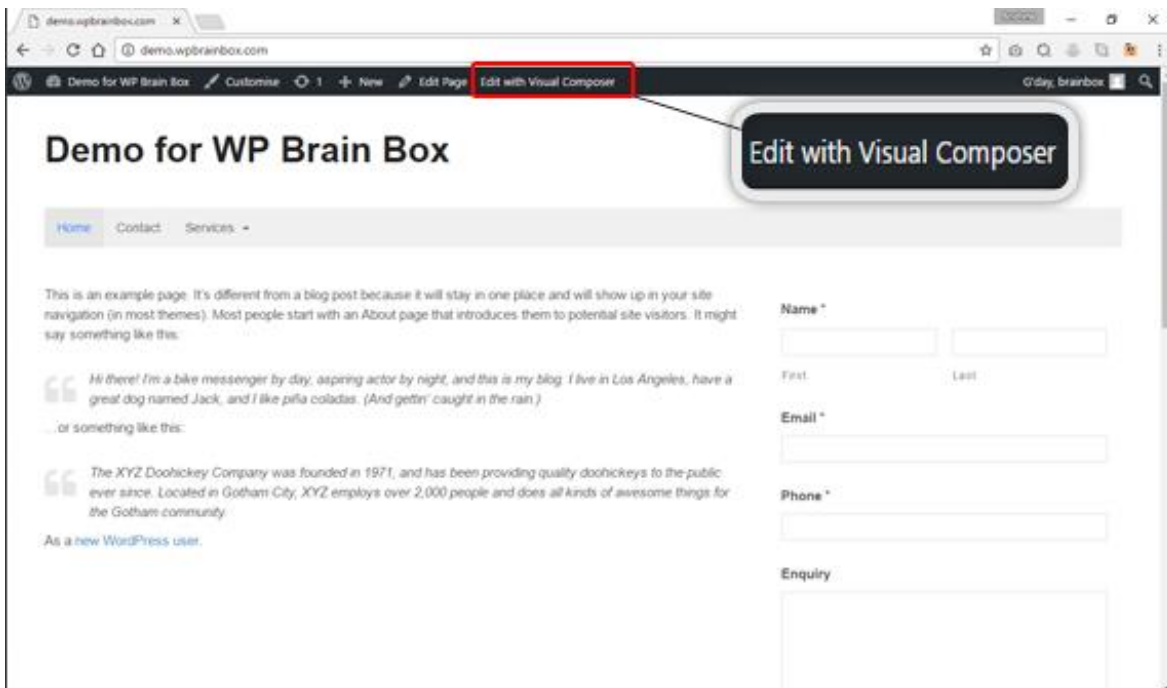

Step 2: You will now be on the backend editor view of the page

After clicking your desired page to edit, it will take you to the editing area of the page.

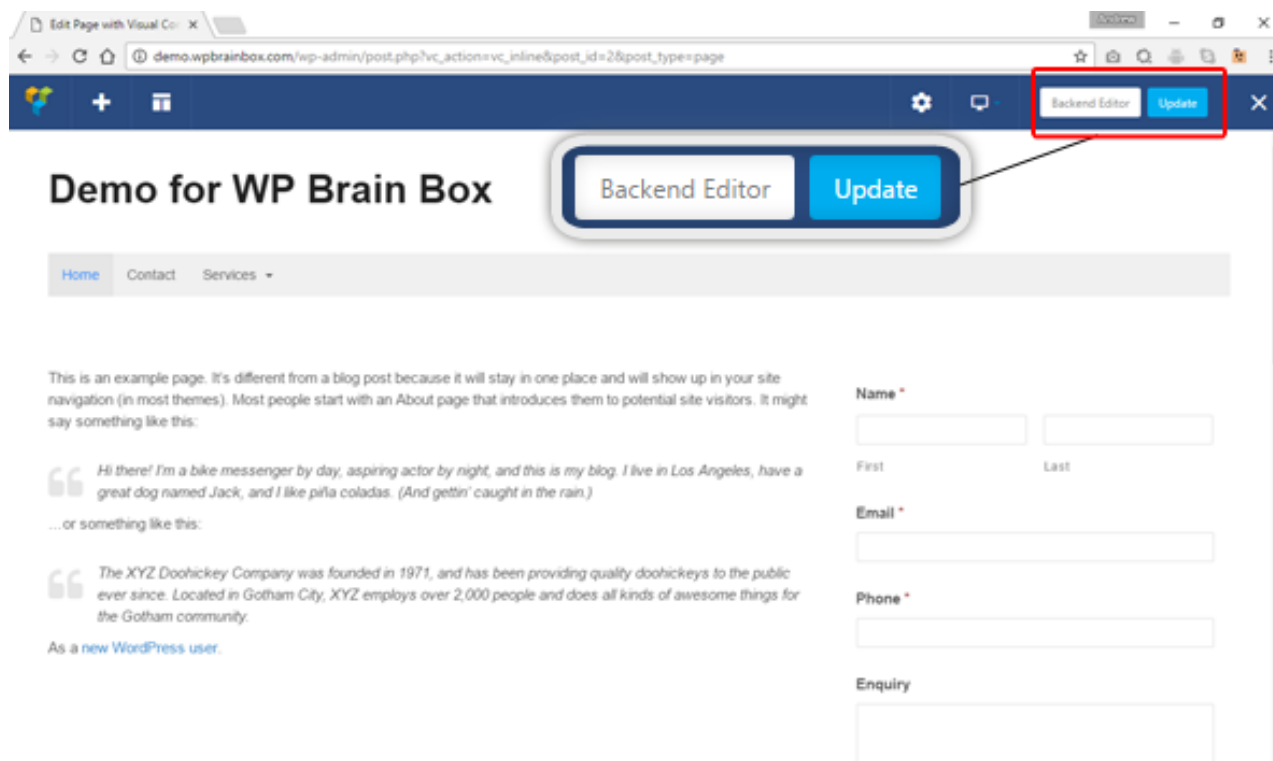

OR

Step 1: Click **Edit with Visual Composer**

If you are using Visual Composer plugin, you can click **Edit with Visual Composer**

Step 2: Now you are on the frontend editor

The **Edit with Visual Composer** is a frontend editor. As you edit the page you can see the changes more real-time as you do them. If you're finished, you can press update then close it which are both located at the top-right corner of the editor.
