

ADD A TEXT BLOCK TO A PAGE WITH VISUAL COMPOSER

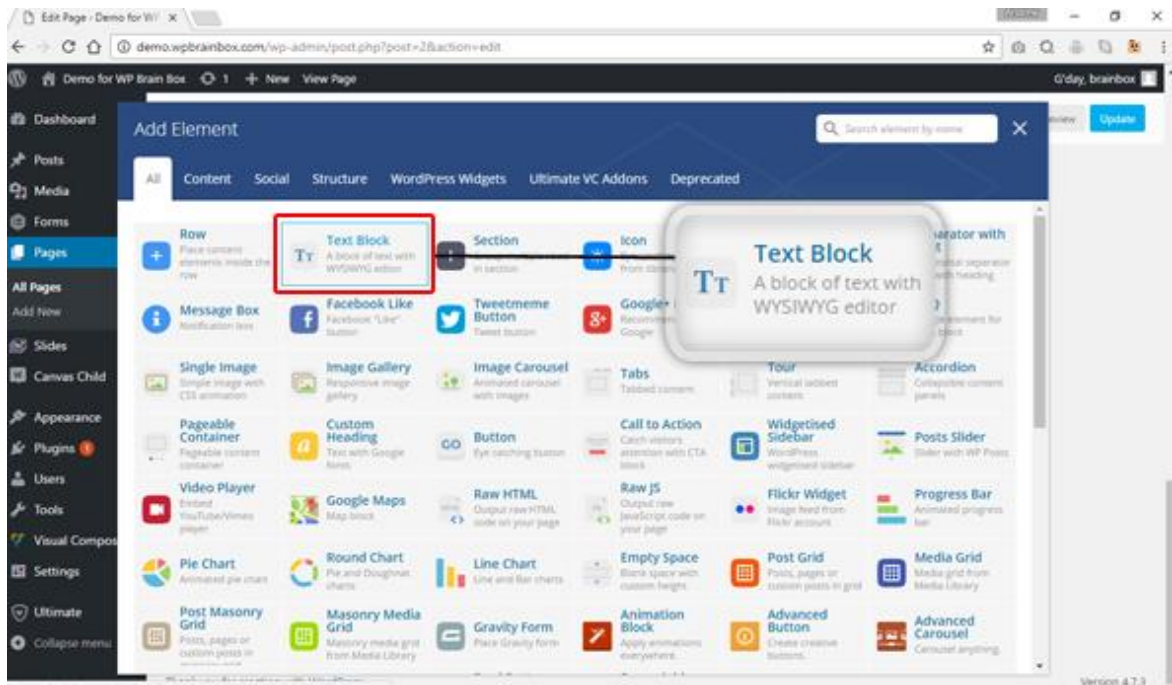

In Visual Composer, **Text Block** is the most basic elements that you could need and you want to use to add some words in your page.

Step 1: Click + sign

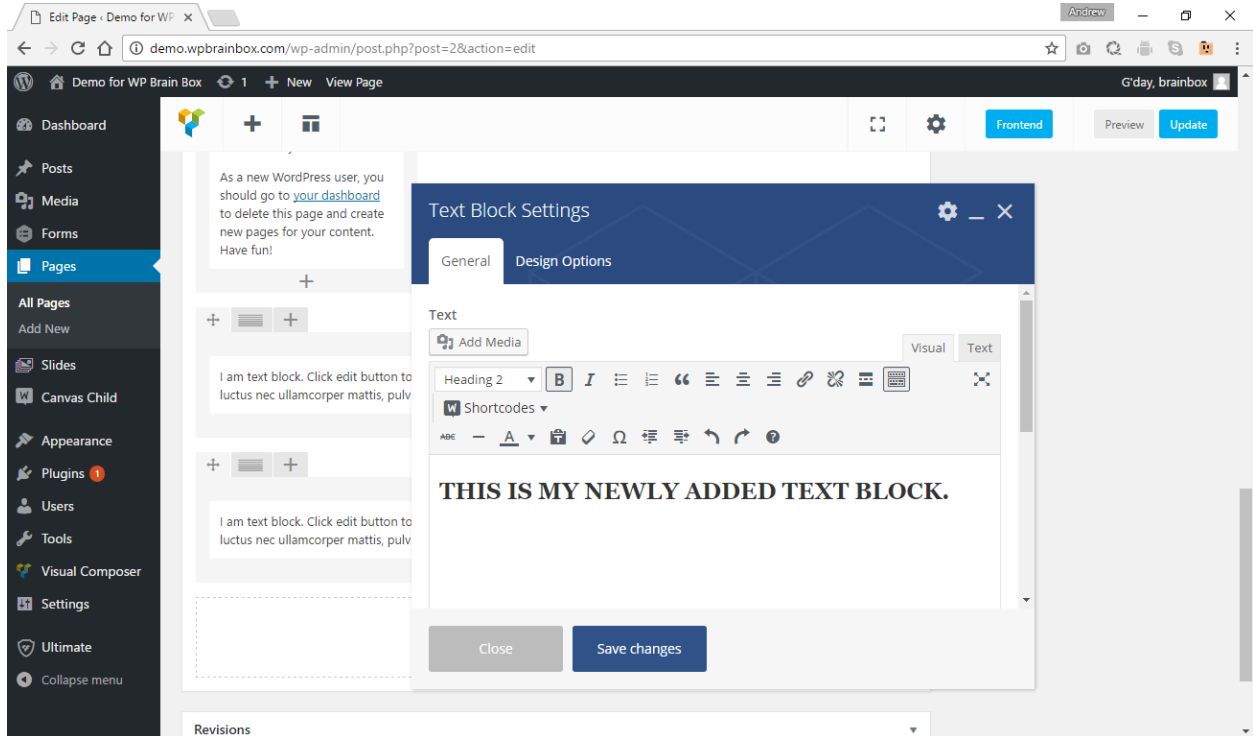

To add a new row wherein you can place your text block, click on the + sign below.

Step 2: Add a Text Block

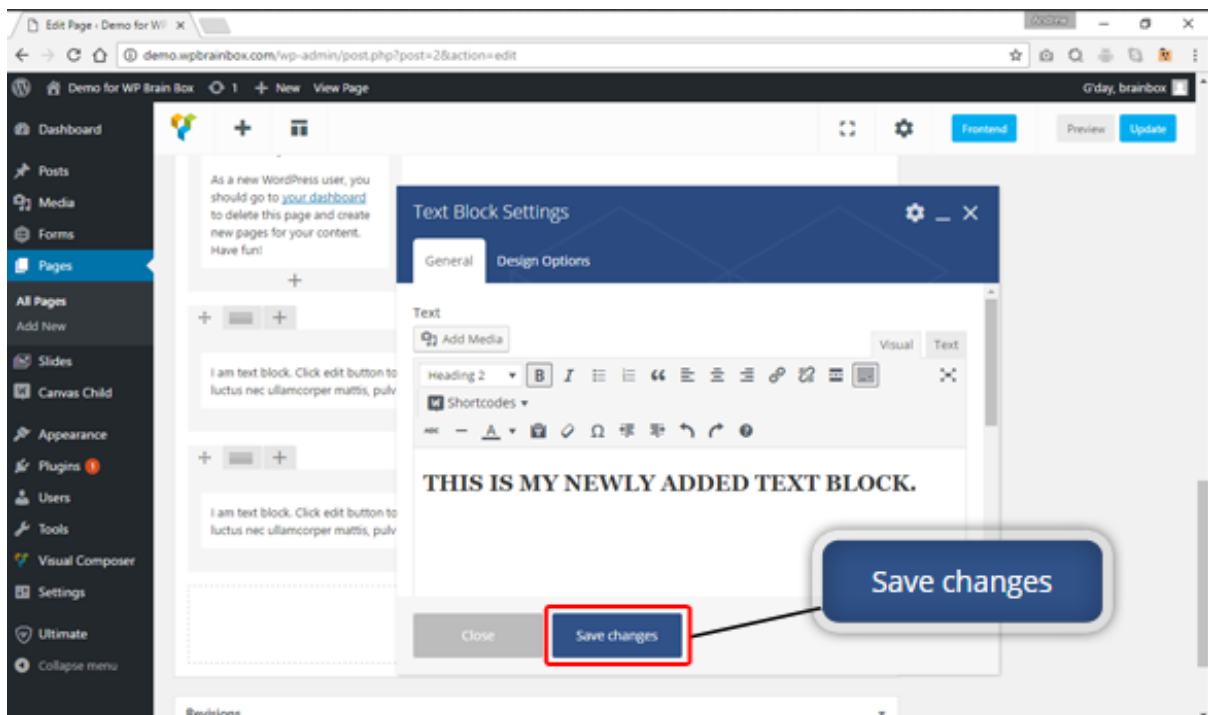

Upon clicking the + sign, **Add Element** box will appear. To add a new text block, click on the Text Block box.

Step 3: Customize your Text Block

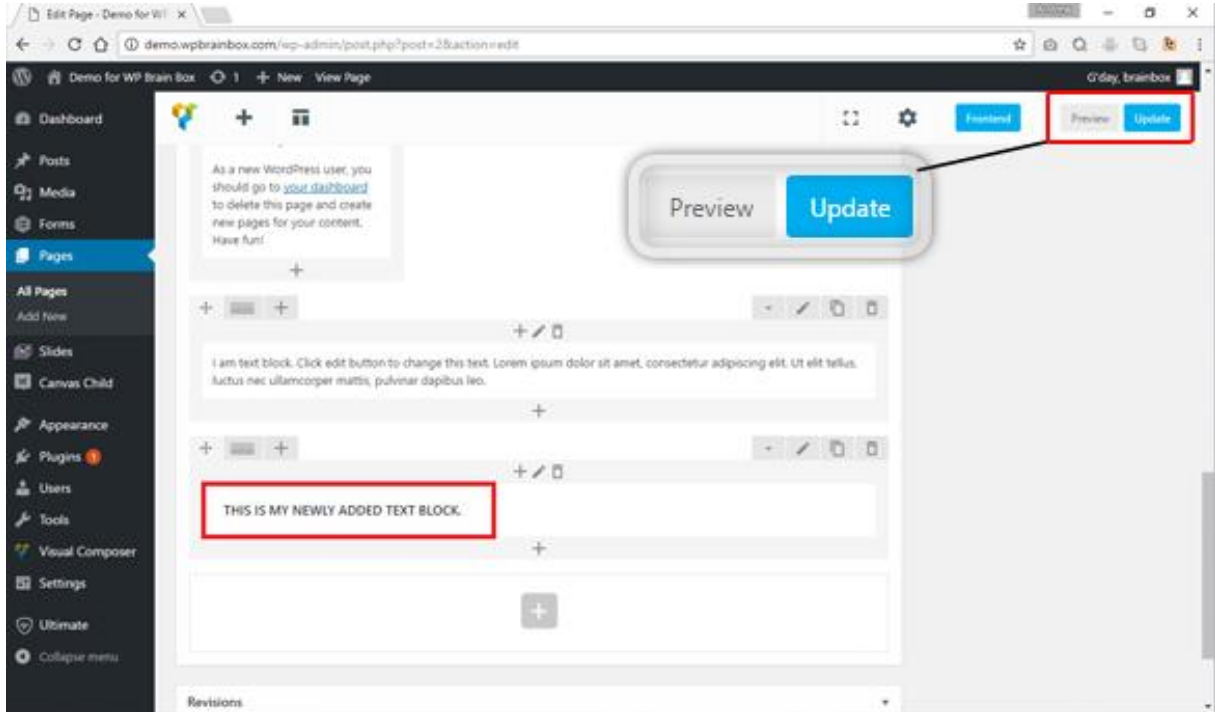

Clicking on the **Text Block** will pop up the **Text Block** setting. Now, we're presented with a pretty normal text editor where you can customize your text.

Step 4: Save your Text Block

After formatting and editing your text block, click **Save Changes** button to save your newly added text block.

Step 5: New row for Text Block

Now you can see your text block in a new row at the bottom of the page. To update our page, click **Update** and to view it you can click **Preview**.
