## CREATE A TEXT LINK WITHIN A TEXT BLOCK
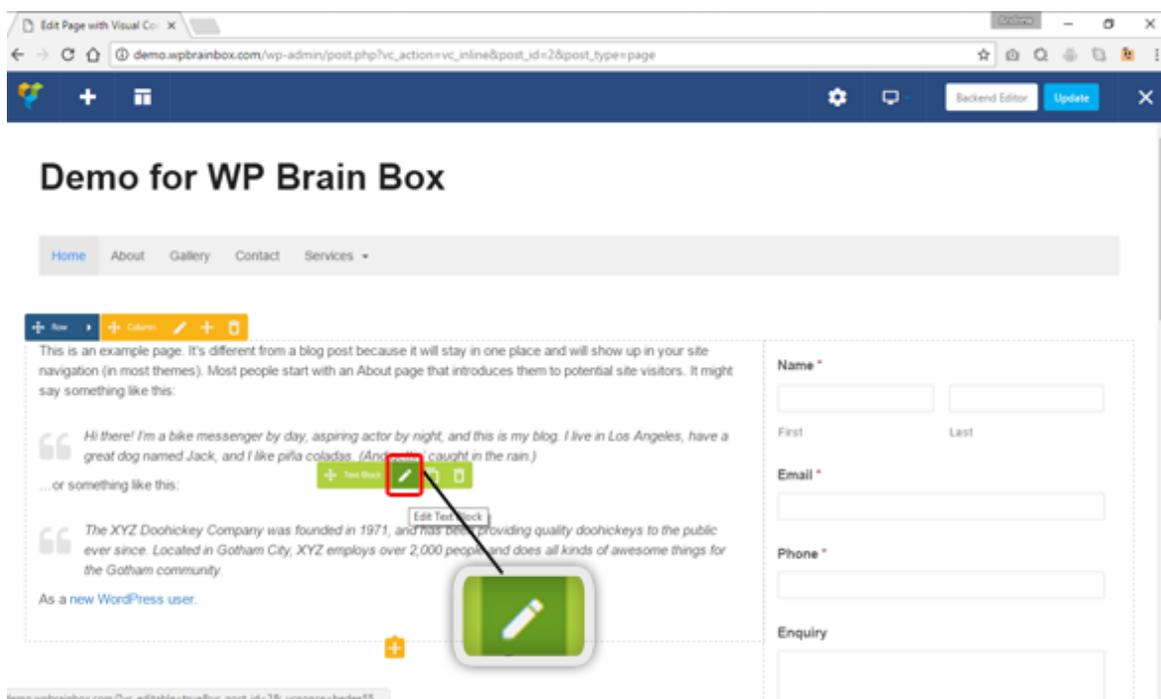

WITH VISUAL COMPOSER
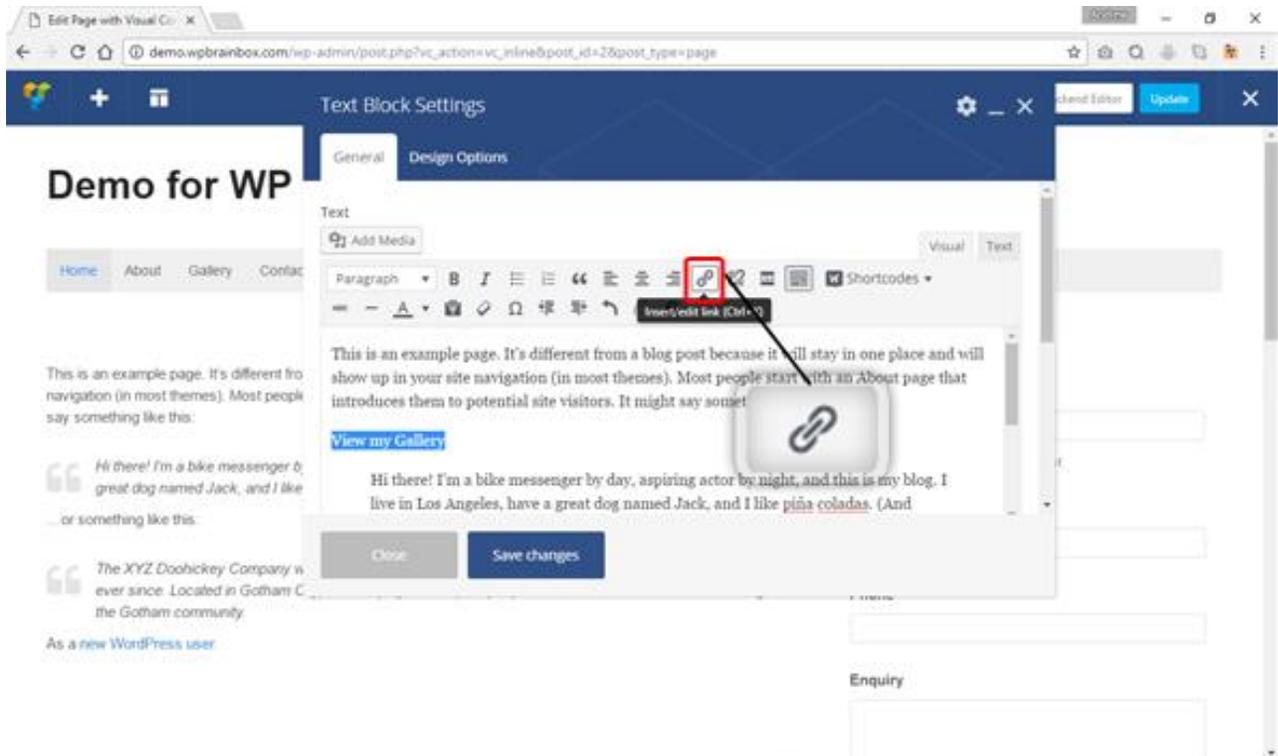

Step 1: Edit page using Visual Composer

Let's make a text link to another page. To do that, first, we need to edit the page where that text is located. To edit the page, click **Edit with Visual Composer**.
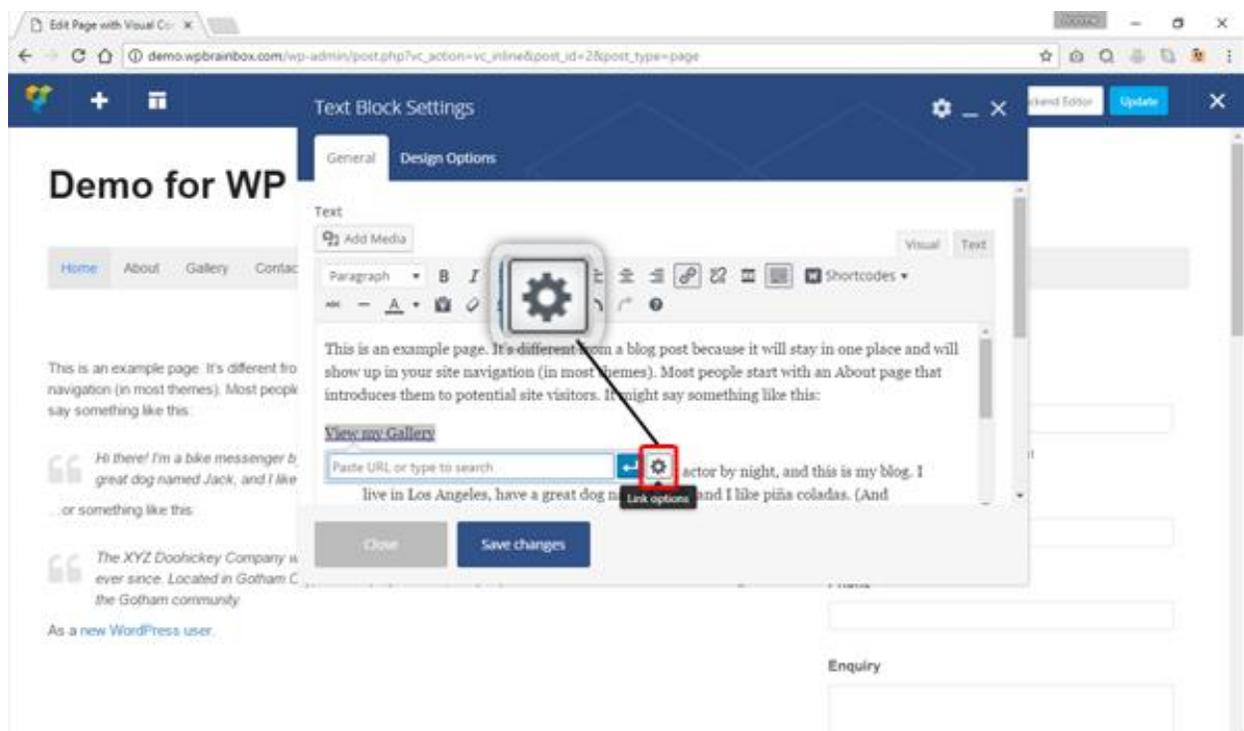

Step 2: Edit a Text Block

To edit a text block, hover your mouse to a text block and click on the **pencil** icon in the green bar.
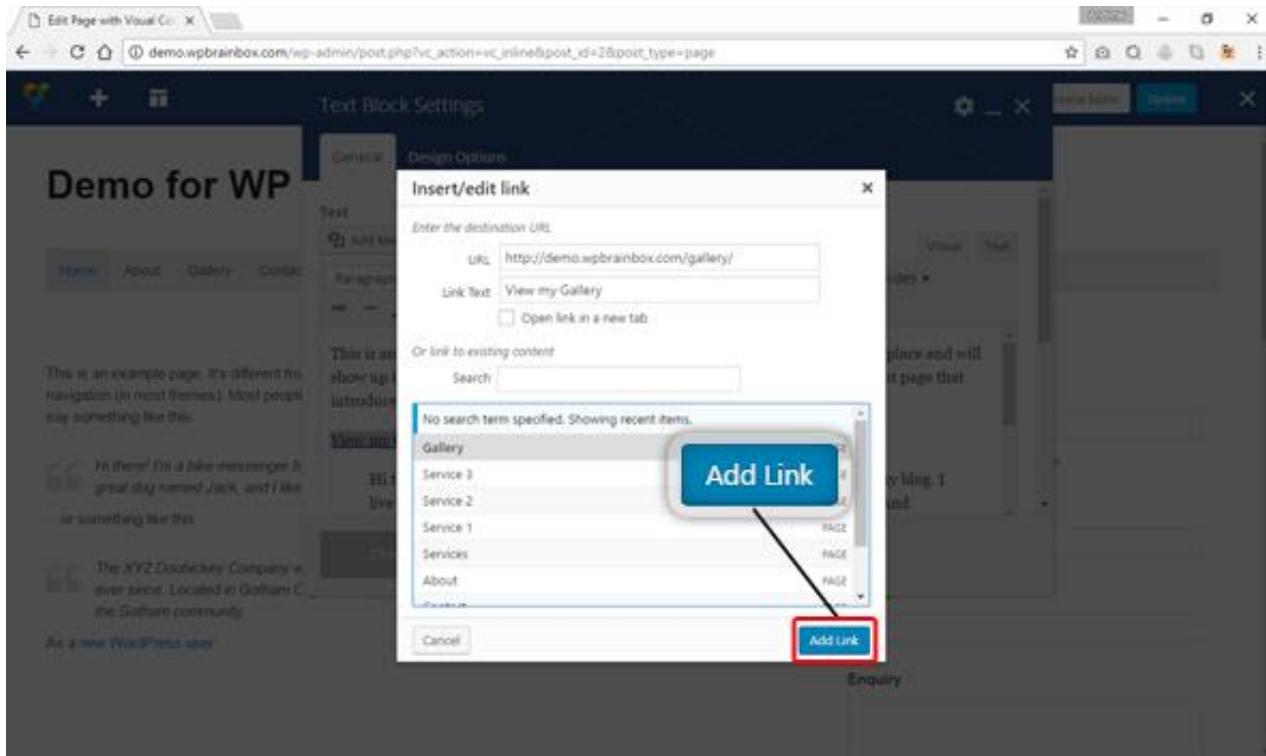

Step 3: Text block Setting will pop-up

In magnified image above, you can see the **Insert/Edit Link** icon. It looks like a little chain link. To hyperlink a text, first, you need to highlight the text that you want to link. After highlighting the text you want to link, click on the Insert/Edit Link icon.
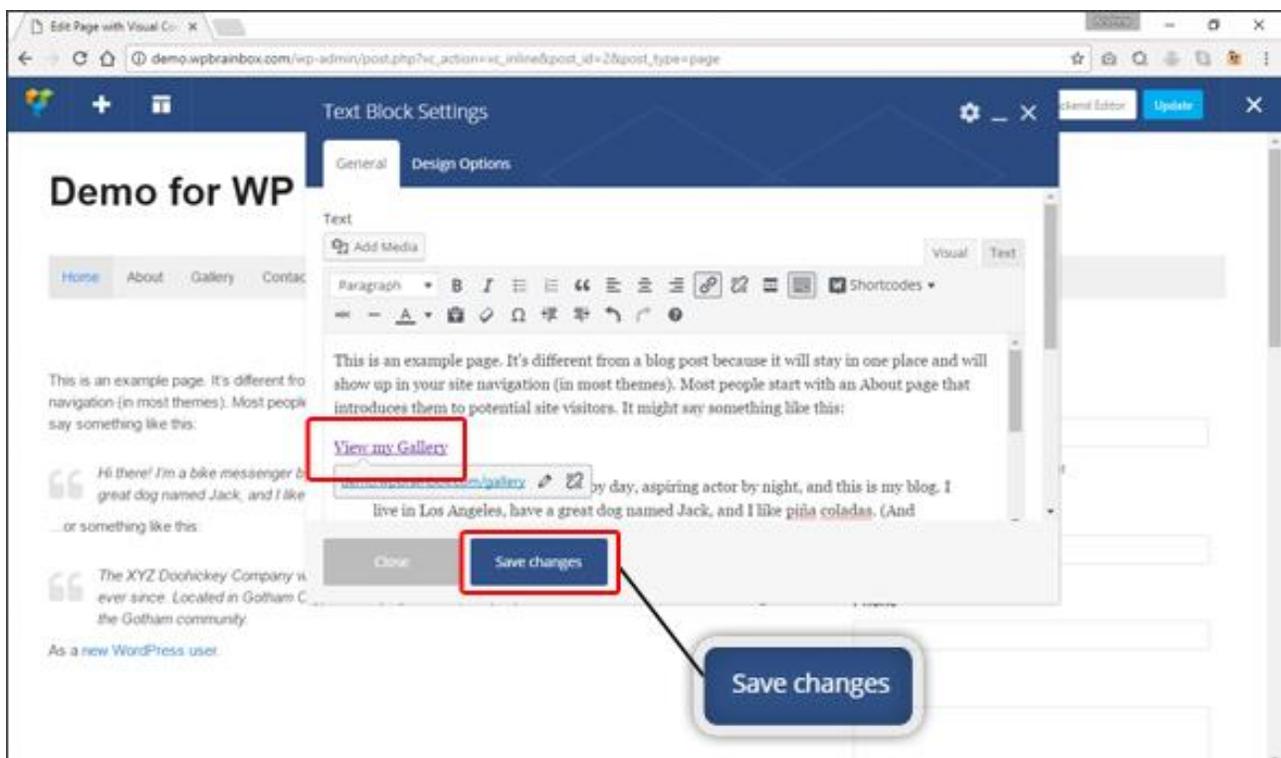

Step 4: Hyperlink a text

After you click the Insert/Edit Link icon, a textbox will appear. This is the textbox wherein you place the link of the page to hyperlink a text. However, if you don't have the link of the page, you can link on the cog at the rightmost side of the textbox.

**Step 5**: Search for the page that you want to be linked

If you manage multiple pages, you can directly search the page that you want. Type the name of the page in the **Search** textbox. If you already found the page, click on it and the **URL textbox** will be automatically filled with the page's link. Once done, click on the **Add Link** button.
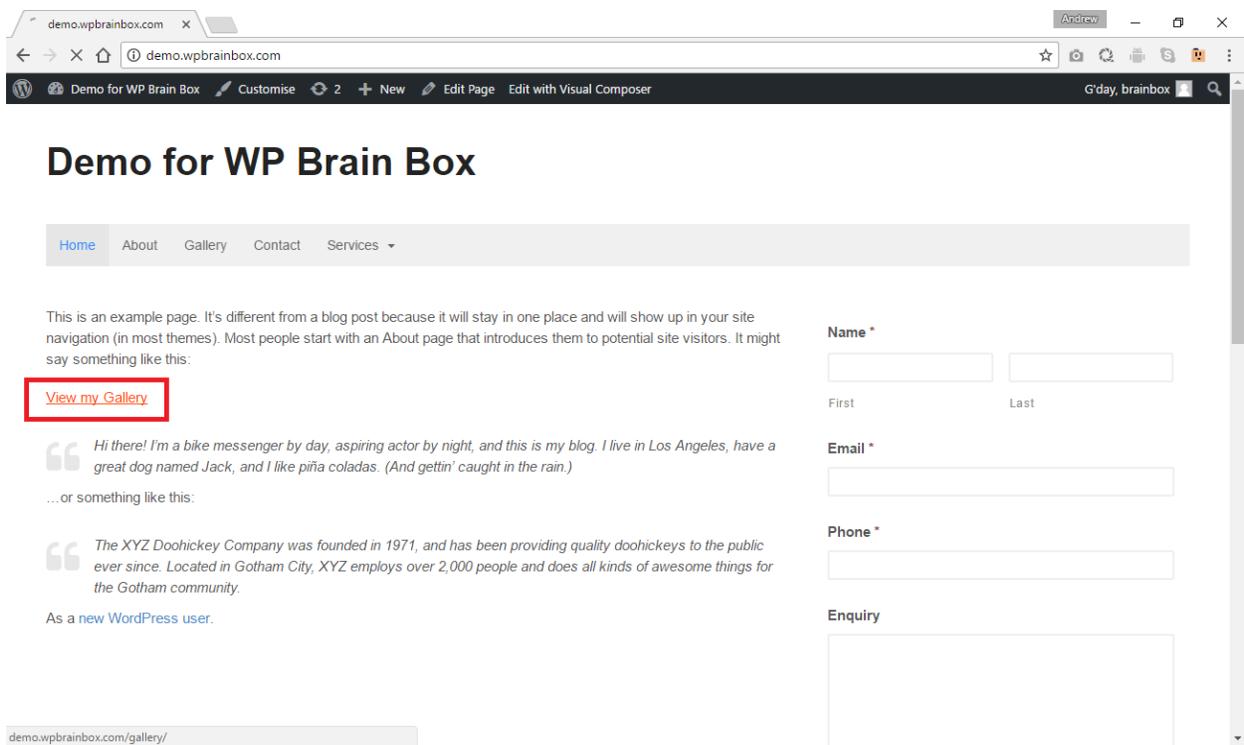

Step 6: Text already linked

As you can see, the text the we highlighted is already linked to our desired page destination. If you have no more changes, click **Save Changes**. Afterwards, click Close to close the Text Block Setting.

Step 7: Update page

After closing the Text Block Setting, click on the **Update** button. This will commit the changes to the database. Afterward, click **X** to exit the Visual Composer.

Step 8: Link ready

As you can see, the text is already linked and is now ready to be clicked by everyone.
