

UPLOAD MULTIPLE IMAGES INTO WORDPRESS

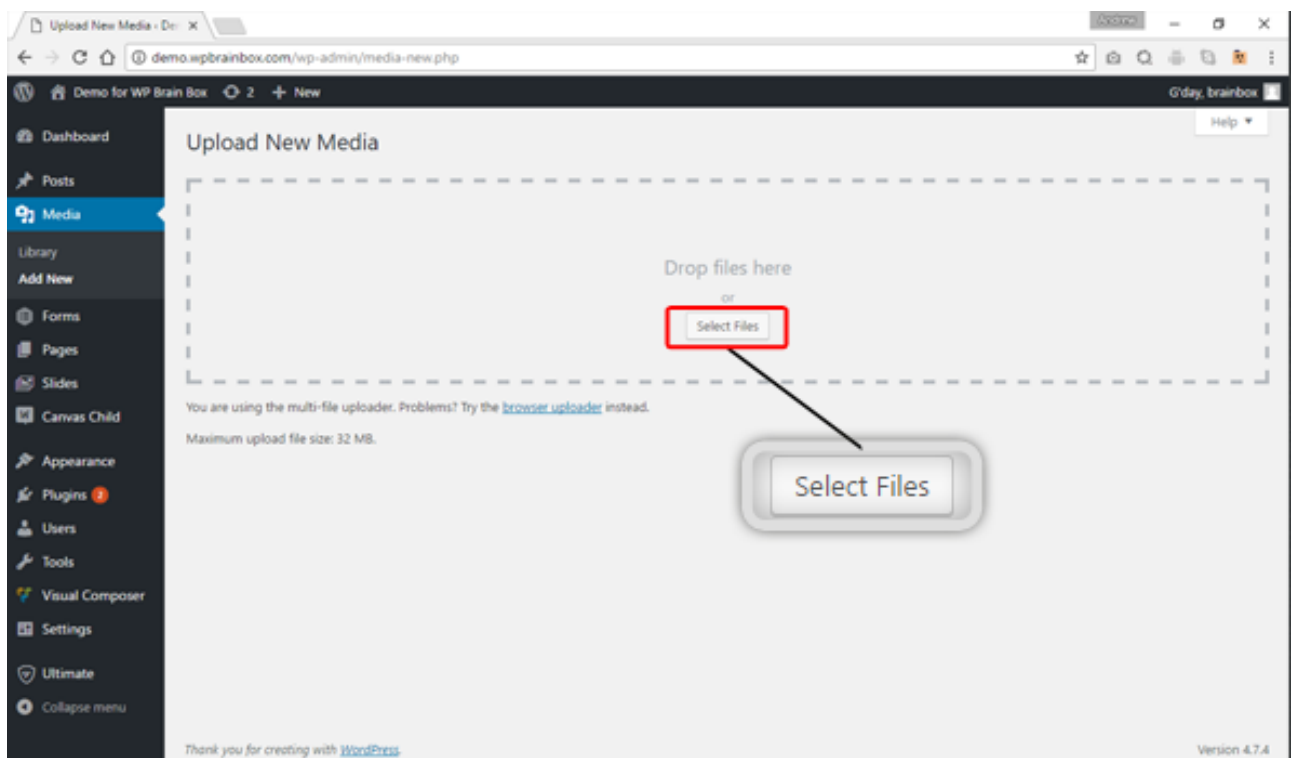

Uploading multiple images is great if you've got a whole lot of image you need to add in hurry.

Step 1: Go to Media Gallery and Add New

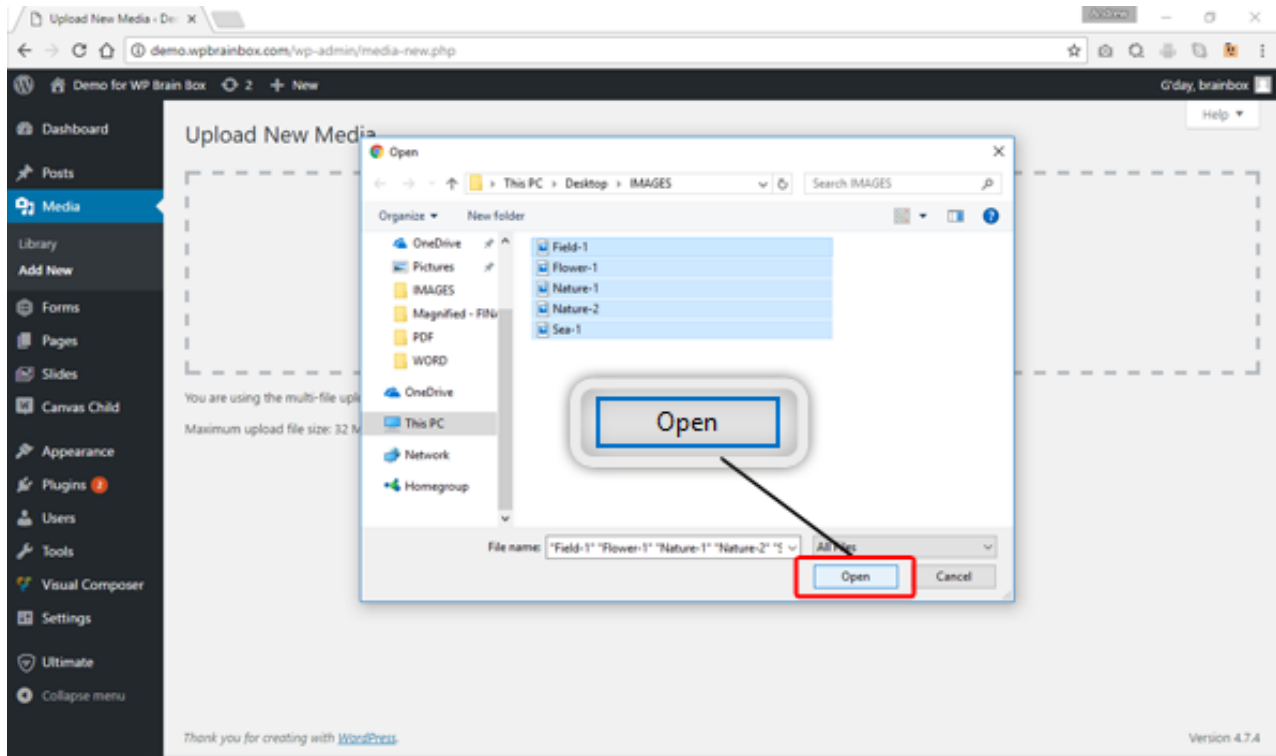

To do that, hover **Media** on the dashboard and click **Add New**.

Step 2: Add multiple images

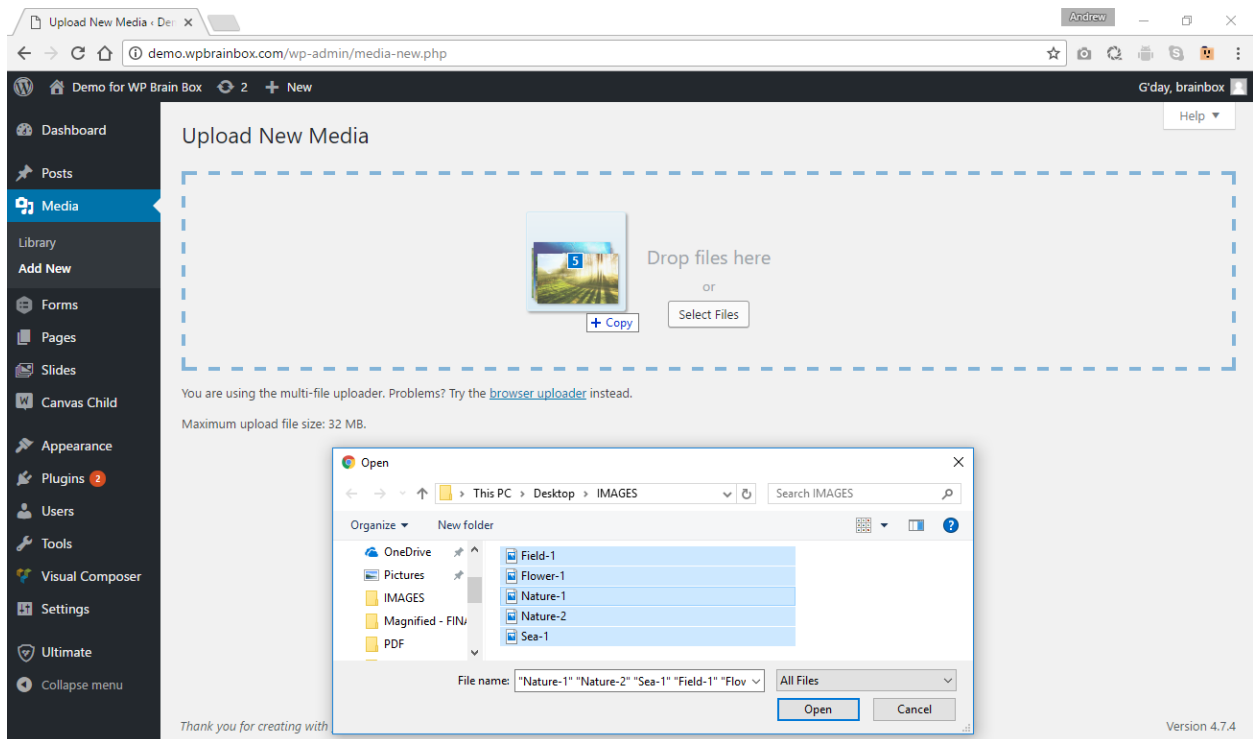

Click on the **Select Files** button and your file explorer will pop-up.

Step 3: Select the files you want to upload

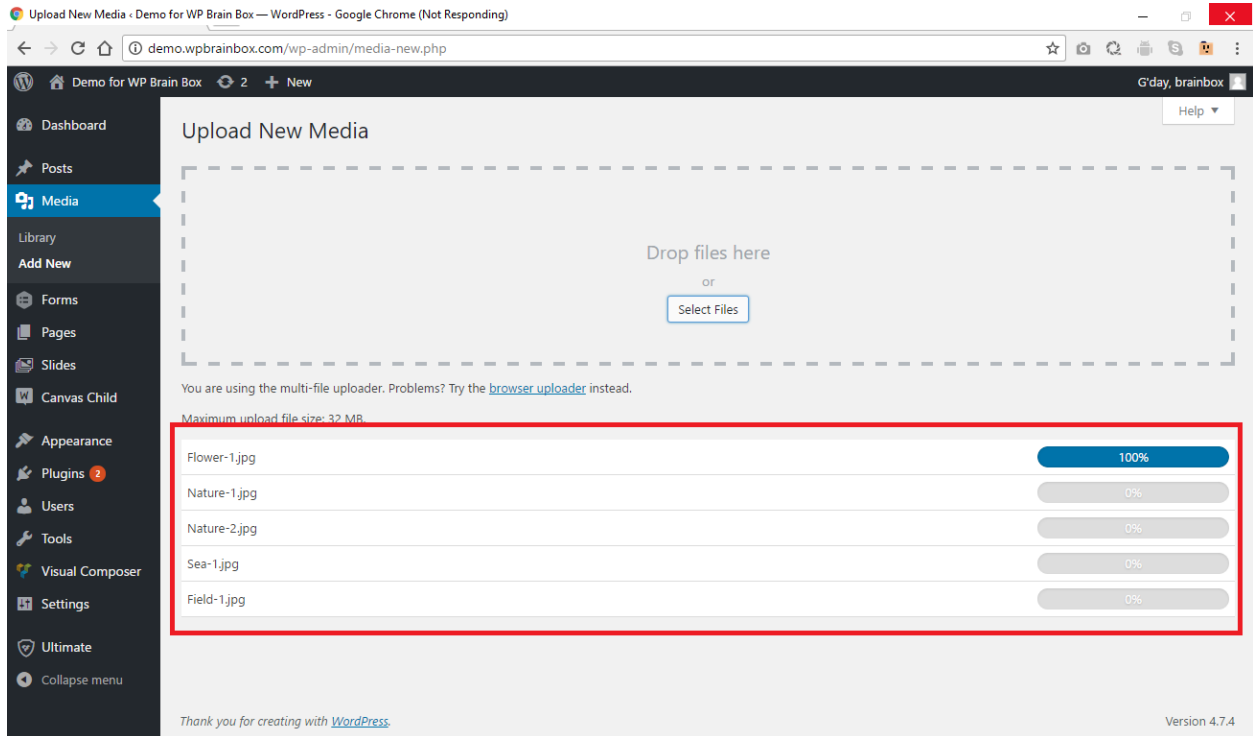

Select all the files you want to upload. Selected files are indicated in blue highlight. Once done, click **Open**.

OR

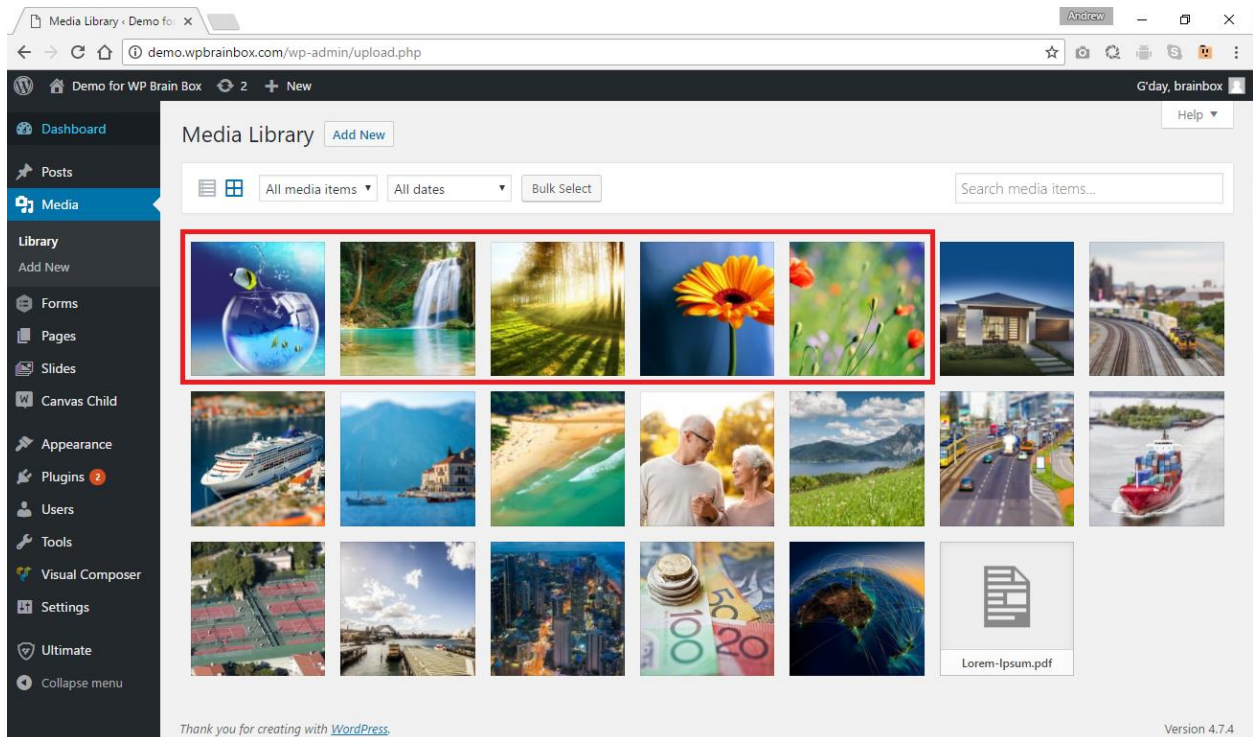

You can also add multiple images by dragging and dropping it. First, in the file browser, select all the images you want to upload. Highlighted files mean that these files are selected. Once done, drag those to your WordPress Media Library. Don't drop it yet, wait for the crooked box to turn blue.

Step 5: Images Uploading

Wait for the images to be uploaded.

Step 6: New images successfully added

Check on the **Library** and you'll see your uploaded images are successfully added.
